Vagrant
CCNA 1, CCNA 2

EXPERIENCE

MoreCommerce   APRIL 2020 - PRESENT
SOFTWARE ENGINEER

E-commerce platforms - MoreCommerce / Owned Shops
- working on a PHP 7 monolith platform, for both merchants and buyers, which interacts with a JAVA service used mainly for order processing
- designing and implementing new features based on business requirements
- investigating and reproducing bugs encountered by clients and ensuring they won't happen again by fixing and writing tests to cover missing cases
- integrating other platforms through APIs (Walmart, Sendgrid, Cordial, ChannelAdvisor)
- writing scalable code to support large amount of data (processing millions of records)
- writing documentation
- code refactoring and cleaning unused features
- code reviews
- writing functional and unit tests

Admin platform for business/support teams
- moving pages from EXT JS to Vue.js
- adding new features and improvements
- writing functional and unit tests

Soft Dreams SRL
FULL STACK WEB DEVELOPER
